| 20150317 | Ardea herodias | great blue heron | ABNGA04010 | 10 | Seen | resting, preening. I also observed the rookery from highway 101 (~1/4 of a mile away) for an hour and 45 minutes. I observed 12 herons fly into the stand and four herons fly out of the stand. | at least Nine nests were observed in four sika spruce trees. A through stand search was not conducted so additional nest and individuals may be present in adjacent areas of the stand | We did not observe egg shell fragments but the rookery is well known to many adjacent landowners as it has been present for at least 35 years according to one adjacent landowner. | GPS | 5 m | DNT | 4112482 | Larson, M. et al. | LAR15F0003 | 0 |
